## TOOLS REQUIRED FOR INSTALLATION

Basin Wrench

Adjustable Wrench

Teflon Tape

Silicone Sealant

Screwdriver

Put the base cover over the pipe.

Install the flexible hose now and ensure the flexible hoses are hand tightened into place.(DO NOT USE SPANNER TO TIGHTEN AS IT CAN DAMAGE THE O-RING). The flexible hoses are to be fitted into the correct inlets for hot water and for cold water.

Fix the screw position

Screw the pipe to the base.

Fix the faucet body to the pipe.

Connect another side of the flexible hose to the water supply pipe. Make sure they are to be fitted into the correct outlets for hot water and cold water.

Use the explosion screw to fix the base on the ground. and put the base cover over the base.

The installation is completed.

Connect the shower hose and hand shower.

After installation is complete, remove Spray head and rotate handle to the close position. Turn Water Supply Valves on, and check all connections for leak. Flush faucet by running hot and cold water in full position for one minute. Re tighten the Aerator.
